

01.

‘Twice exceptional’ refers to those neurodivergent folk who are also intellectually gifted.

It is sometimes abbreviated to “2e”.

02.

Twice exceptional is not a diagnosis.

Rather, it is a term that helps us to better understand the thinking style and learning or support needs of someone who is both neurodivergent and intellectually gifted.

03.

The 2e neurotype is different. Twice.

2e individuals are outside the ‘typical’ range in two ways - neurodivergence and giftedness.

Supporting 2e folk to thrive needs an individualised and thoughtful approach.

04.
